```python
@app.get('/')
def home():
    response = {
        "message": "There's no place like home"
    }
    return make_response(jsonify(response), 200)
```

```
In [5]: r = httpx.get('http://127.0.0.1:5000/door')

In [6]: r.json()
Out[6]:
{'code': 'authorization_header_missing',
 'description': 'Authorization header is expected'}
```

```python
@app.get('/door')
@cross_origin(allow_headers=["Authorization"])
@requires_auth
def door():
    response = {
        "message": "you got through the door"
    }
    return make_response(jsonify(response), 200)
```
